- Pivot Points

ADVANCE LEARNING PROGRAMME

In our most advanced trading course, you will learn how the concepts introduced in earlier modules are utilized in 'real world' scenarios.

Moving from the theoretical to the practical, articles cover a range of technical indicators and their application, risk management, and how price action analysis can support a technical approach.

Take your technical analysis and chart reading skills to another level by learning Heikin Ashi, Elliott Wave Theory and harmonic price patterns.

Dig deeper into more technical analysis concepts like trading divergences, breakouts and using multiple time frames on your charts.

Learn how to gauge whether the market is bullish or bearish, how to trade during news releases and how to potentially make money without price moving.

Learn how other asset classes like stocks, bonds and commodities can affect the foreign exchange market.

Learn how to develop a trading plan, create a trading system and maintain a trading journal.

Develop the proper risk management skills and mindset so you don't become part of the 95% of new traders who end up losing all their money.

Some final words of wisdom before you venture out into the challenging world of trading forex.
